## A Day of Fitness and Fellowship: TPSODL Hosts BA Sports Meet 2026 in Berhampur

**Berhampur:** TPSODL organised the BA Sports Meet 2026 at Mahatma Gandhi Stadium, Berhampur, uniting 220 participants from 20 Business Associates (BAs) for a day filled with energy, enthusiasm, and camaraderie. The event celebrated the values of health, teamwork, and shared achievement that form the foundation of TPSODL's work culture.

Participants competed passionately in a variety of events, including 100m and 400m sprints, 4x100m relay, long jump, shot put, the ever-energetic tug of war, and musical chairs (only for female participants). The atmosphere buzzed with excitement as teams encouraged one another, reflecting a perfect blend of competitive spirit and collaboration.

The event was graced by TPSODL's senior leadership team, whose presence inspired participants and reinforced the company's commitment to employee engagement and well-being. They highlighted that such platforms go beyond physical fitness — they also enhance mental resilience, boost confidence, relieve stress, and build stronger interpersonal bonds among team members.

Beyond the thrill of competition, the Sports Meet served as a meaningful reminder of how sports can promote work-life balance and instil values like focus, discipline, and mutual support. It strengthened relationships among employees, business associates, and vendors, fostering a true sense of fellowship.

Speaking on the meet, Mr. Amit Kumar Garg, Chief Executive Officer, TPSODL, said, 'Sports not only promote physical health but also play a vital role in shaping our mental strength and team spirit. Events like the BA Sports Meet inspire collaboration, discipline, and healthy competition—values that help us grow stronger together as an organisation.'

The BA Sports Meet 2026 stood as a testament to TPSODL's dedication to nurturing both the physical and mental well-being of its people while deepening collaboration across its extended family of partners.

## Reliable Power Boost for Sunabeda

**\* 7000 Consumers to be benefited**

**Berhampur, February:** TP Southern Odisha Distribution Limited (TPSODL) has strengthened the power distribution infrastructure in Sunabeda, Koraput district, by enhancing substation capacity and upgrading key transmission systems. The initiative aims to improve voltage stability, ensure reliable power supply, and support the region's growing electricity demand.

As part of the initiative, TPSODL commissioned a new 8 MVA power transformer at the Sunabeda Primary Substation, increasing the total substation capacity from 11.3 MVA to 16.15 MVA. The enhancement has been undertaken to resolve voltage-related issues and to support the increasing power load in Sunabeda and surrounding areas.

Previously, the Sunabeda Primary Substation was operating with three transformers of 3.15 MVA, 3.15 MVA and 5 MVA capacity. In view of the rising load, TPSODL replaced one 3.15 MVA transformer with a higher-capacity 8 MVA transformer. The substation is now operating with transformers of 3.15 MVA, 5 MVA and 8 MVA, enabling better load distribution and improved system reliability.

Following the capacity enhancement, voltage levels across the network have improved significantly. Power supply has become more stable, and load management has improved across the entire system. The upgraded configuration will also allow smoother power arrangements during maintenance works, reducing inconvenience to consumers.

Around 7,000 consumers in and around Sunabeda will benefit from the infrastructure strengthening. Areas including Sunabeda NAC Town, Sunabeda NAC Rural, public offices, water supply installations, Jadaguda and parts of Semiliguda Block are expected to receive improved and more reliable electricity supply, with fewer voltage fluctuations.

Sunabeda is a key industrial and urban centre in Koraput district and holds strategic importance in southern Odisha. The township houses the Engine Division of Hindustan Aeronautics Limited (HAL), a major defence public sector undertaking of the Government of India. The presence of HAL has contributed significantly to industrial activity, urban growth and employment in the region. Sunabeda is also known for its scenic surroundings, tribal culture and tourism potential.

With rapid urbanisation, expansion of residential areas, growth of commercial establishments and increasing economic activity, electricity demand in Sunabeda has been

rising steadily. Keeping future requirements in mind, TPSODL planned and executed the present infrastructure augmentation to support long-term development.

In addition to the substation capacity enhancement, TPSODL has completed refurbishment of the 33 kV line connecting the Sunabeda Grid Substation to the Sunabeda Primary Substation. Old and weak connections were replaced with new, high-quality conductors.

The internal system of the substation was also strengthened through the installation of a new bus bar arrangement to safely handle higher electrical loads.

The upgraded 33 kV line and reinforced substation system are now capable of handling peak load conditions, improving operational safety and overall system efficiency. The strengthened infrastructure will also support future expansion without affecting service quality.

Commenting on the development, Mr. Amit Kumar Garg, CEO, TPSODL, said that the company is continuously upgrading its power infrastructure in fast-developing urban and semi-urban areas to meet rising electricity demand. He said Sunabeda is emerging as an important growth centre, and reliable power supply is essential to support industrial, commercial and residential development. He added that the upgradation reflects TPSODL's commitment to providing stable, quality and uninterrupted power supply while contributing to economic growth and improved quality of life.

## टीपीएस ओडीएल ने सुनाबेड़ा में किया बड़ा पावर इंफ्रास्ट्रक्चर अपग्रेड

नवभारत ब्यूरो। भुवनेश्वर।

टीपी सदरन ओडिशा डिस्ट्रीब्यूशन लिमिटेड (टीपीएसओडीएल) ने कौरापुट जिले के सुनाबेड़ा क्षेत्र में बिजली वितरण अवसंरचना को मजबूत करने की दिशा में एक अहम कदम उठाया है। सबस्टेशन क्षमता बढ़ाने और प्रमुख ट्रांसमिशन प्रणालियों के उन्नयन से क्षेत्र में वोल्टेज स्थिरता और बिजली आपूर्ति की विश्वसनीयता में उल्लेखनीय सुधार हुआ है। टीपीएसओडीएल ने सुनाबेड़ा प्राथमिक सबस्टेशन में 8 एमवीए का नया पावर ट्रांसफॉर्मर स्थापित किया है, जिससे सबस्टेशन की कुल क्षमता 11.3 एमवीए से बढ़कर 16.15 एमवीए हो गई है। पहले यहाँ 3.15 एमवीए, 3.15 एमवीए और 5 एमवीए क्षमता वाले तीन ट्रांसफॉर्मर कार्यरत थे। बढ़ती बिजली मांग को देखते हुए एक 3.15 एमवीए ट्रांसफॉर्मर को हटाकर उसकी जगह 8 एमवीए का उच्च क्षमता वाला ट्रांसफॉर्मर लगाया गया है। अब सबस्टेशन 3.15 एमवीए, 5 एमवीए और 8 एमवीए ट्रांसफॉर्मरों के साथ

संचालित हो रहा है।

इस उन्नयन के बाद नेटवर्क में वोल्टेज स्तर बेहतर हुआ है, लोड प्रबंधन में सुधार आया है और रखरखाव कार्यों के दौरान बिजली आपूर्ति को सुचारू बनाए रखना आसान हो गया है। इस परियोजना से सुनाबेड़ा और आसपास के करीब 7,000 उपभोक्ताओं को लाभ मिलेगा।

इसके अलावा टीपीएसओडीएल ने सुनाबेड़ा ग्रिड सबस्टेशन से प्राथमिक सबस्टेशन को जोड़ने वाली 33 केवी लाइन का भी नवीनीकरण किया है। पुराने कनेक्शनों को नए कंडक्टर से बदला गया है और सबस्टेशन में नया बस-बार सिस्टम लगाया गया है, जिससे प्रणाली अब अधिक भार संभालने में सक्षम हो गई है। टीपीएसओडीएल के सीईओ अमित कुमार गर्ग ने कहा कि सुनाबेड़ा तेजी से विकसित हो रहा क्षेत्र है और औद्योगिक, वाणिज्यिक व आवासीय विकास के लिए भरोसेमंद बिजली आपूर्ति जरूरी है। यह उन्नयन कंपनों की गुणवत्तापूर्ण और निर्बाध बिजली आपूर्ति की प्रतिबद्धता को दर्शाता है।

**7000 Consumers to be benefited**

**Bhubaneswar:** TP Southern Odisha Distribution Limited (TPSODL) has strengthened the power distribution infrastructure in Sunabeda, Khordha district, by enhancing substation capacity and upgrading key transmission systems. The strategic aim is to ensure voltage stability, boost reliable power supply, and support the region's growing electricity demand.

As part of the initiative, TPSODL commissioned a new 2 MVA power transformer at the Sunabeda Primary Substation, increasing the total substation capacity from 0.2 MVA to 10.2 MVA. The enhancement has been undertaken to resolve voltage-related issues and to support the increasing power load in Sunabeda and surrounding areas.

Previously, the Sunabeda Primary Substation was operating with three transformers of 200 MVA, 200 MVA and 2 MVA capacity. In view of the rising load, TPSODL installed one 2 MVA transformer with a higher capacity & MVA transformer. The substation is now operating with a combination of 200 MVA, 2 MVA and 2 MVA, enabling better load distribution and improved system reliability.

Following the capacity enhancement, voltage levels across the network have improved significantly. Power supply has become more stable, and load management has improved across the entire system. The upgraded configuration will also allow smoother plant arrangements during maintenance works, ensuring uninterrupted supply.

Around 7000 consumers in and around Sunabeda will benefit from the infrastructure strengthening work involving Sunabeda and other Sunabeda and Khordha public offices, water supply installations, educational and parts of Jagadipada Block are expected to receive improved and more reliable electricity supply with fewer voltage fluctuations.

Sunabeda is a key industrial and urban center in Khordha district and holds strategic importance in southern Odisha. The township houses the Engine Division of Hindustan Aeronautics Limited (HAL), a major defense public sector undertaking of the Government of India. The presence of HAL has contributed significantly to industrial activity, urban growth and employment in the region. Sunabeda is also known for its scenic surroundings, tribal culture and tourism potential.

With rapid urbanization, expansion of residential areas, growth of commercial establishments and increasing economic activity, electricity demand in Sunabeda has risen.

Long-term planning for future requirements in view, TPSODL planned and executed the present infrastructure augmentation to support long-term development.

In addition to the substation capacity enhancement, TPSODL has completed reinforcement of the 22 KV line connecting the Sunabeda Substation to the Sunabeda Primary Substation. 112 wire cross-arms were replaced with new, high-quality conductors. The internal spaces of the substation were also strengthened through the installation of a new bus bar arrangement to safely handle higher electrical loads.

The upgraded 22 KV line and reinforced substation system are key aspects of handling peak load conditions, improving operational safety and overall system efficiency. The strengthened infrastructure will also support future expansion without affecting service quality.

Commenting on the development, Mr. Jitendra Singh, CEO, TPSODL, said, "We are committed to continuously upgrading the power grid infrastructure to cater to growing urban and semi-urban areas to meet rising electricity demand. For Sunabeda, which is emerging as an important growth center, ensuring reliable power supply is essential to support industrial, commercial and residential development. We added that the upgrade reflects TPSODL's commitment to providing stable, quality and uninterrupted power supply while contributing to economic growth and improved quality of life."

## Reliable Power Boost For Sunabeda: 7000 Consumers To Be Benefited

By [ODISHABARTA](#) | February 8, 2024 | 10:45 AM | [View All News](#)

**Berhampur:** TP Southern Odisha Distribution Limited (TPSODL) has strengthened the power distribution infrastructure in Sunabeda of Koraput district by enhancing substation capacity and upgrading key transmission systems. The initiative aims to improve voltage stability, ensure reliable power supply, and support the region's growing electricity demand. [Click on the image](#)

As part of the initiative, TPSODL commissioned a new 8 MVA power transformer at the Sunabeda Primary Substation, increasing the total substation capacity from 11.3 MVA to 16.15 MVA. The enhancement has been undertaken to resolve voltage-related issues and to support the increasing power load in Sunabeda and surrounding areas.

Previously, the Sunabeda Primary Substation was operating with three transformers of 3.15 MVA, 3.15 MVA and 5 MVA capacity. In view of the rising load, TPSODL replaced one 3.15 MVA transformer with a higher-capacity 8 MVA transformer. The substation is now operating with transformers of 3.15 MVA, 5 MVA and 8 MVA, enabling better load distribution and improved system reliability.

Following the capacity enhancement, voltage levels across the network have improved significantly. Power supply has become more stable, and load management has improved across the entire system. The upgraded configuration will also allow smoother power arrangements during maintenance works, reducing inconvenience to consumers.

Around 7,000 consumers in and around Sunabeda will benefit from the infrastructure strengthening. Areas including Sunabeda NAC Town, Sunabeda NAC Rural, public offices, water supply installations, Jadaguda and parts of Semiliguda Block are expected to receive improved and more reliable electricity supply, with fewer voltage fluctuations.

Sunabeda is a key industrial and urban centre in Koraput district and holds strategic importance in southern Odisha. The township houses the Engine Division of Hindustan Aeronautics Limited (HAL), a major defence public sector undertaking of the Government of India. The presence of HAL has contributed significantly to industrial activity, urban growth and employment in the region. Sunabeda is also known for its scenic surroundings, tribal culture and tourism potential.

With rapid urbanisation, expansion of residential areas, growth of commercial establishments and increasing economic activity, electricity demand in Sunabeda has been rising steadily. Keeping future requirements in mind, TPSODL planned and executed the present infrastructure augmentation to support long-term development.

In addition to the substation capacity enhancement, TPSODL has completed refurbishment of the 33 kV line connecting the Sunabeda Grid Substation to the Sunabeda Primary Substation. Old and weak connections were replaced with new, high-quality conductors. The internal system of the substation was also strengthened through the installation of a new bus bar arrangement to safely handle higher electrical loads.

The upgraded 33 kV line and reinforced substation system are now capable of handling peak load conditions, improving operational safety and overall system efficiency. The strengthened infrastructure will also support future expansion without affecting service quality.

Commenting on the development, **Amit Kumar Garg**, CEO, TPSODL, said the company is continuously upgrading its power infrastructure in fast-developing urban and semi-urban areas to meet rising electricity demand. He said Sunabeda is emerging as an important growth centre, and reliable power supply is essential to support industrial, commercial and residential development. He added that the upgradation reflects TPSODL's commitment to providing stable, quality and uninterrupted power supply while contributing to economic growth and improved quality of life.

\* 7000 Consumers to be benefited.

Bhubaneswar, February: TP Southern Odisha Distribution Limited (TPSOOL) has strengthened the power distribution infrastructure in Sunabeda, Keonjhar district, by enhancing substation capacity and upgrading key transmission systems. The initiative aims to improve voltage stability, ensure reliable power supply, and support the region's growing electricity demand.

As part of the initiative, TPSOOL commissioned a new 8 MVA power transformer at the Sunabeda Primary Substation, increasing the total substation capacity from 11.3 MVA to 16.15 MVA. The enhancement has been undertaken to resolve voltage-related issues and to support the increasing power load in Sunabeda and surrounding areas.

Previously, the Sunabeda Primary Substation was operating with three transformers of 3.15 MVA, 3.15 MVA and 5 MVA capacity. In view of the rising load, TPSOOL replaced one 3.15 MVA transformer with a higher-capacity 8 MVA transformer. The substation is now operating with transformers of 3.15 MVA, 5 MVA and 8 MVA, enabling better load distribution and improved system reliability.

Following the capacity enhancement, voltage levels across the network have improved significantly. Power supply has become more stable, and load management has improved across the entire system. The upgraded configuration will also allow smoother power arrangements during maintenance works, reducing inconvenience to consumers.

Around 7,000 consumers in and around Sunabeda will benefit from the infrastructure strengthening. Areas including Sunabeda NAC Thane, Sunabeda NAC Runk, public offices, water supply installations, judgoda and parts of Santiguda Block are expected to receive improved and more reliable electricity supply, with fewer voltage fluctuations.

Sunabeda is a key industrial and urban centre in Keonjhar district and holds strategic importance in southern Odisha. The township houses the Engine Division of Hindustan Aeronautics Limited (HAL), a major defence public sector undertaking of the Government of India. The presence of HAL has contributed significantly to industrial activity, urban growth and employment in the region. Sunabeda is also known for its scenic surroundings, tribal culture and tourism potential.

With rapid urbanization, expansion of residential areas, growth of commercial establishments and increasing economic activity, electricity demand in Sunabeda has been rising steadily. Keeping future requirements in mind, TPSOOL planned and executed the present infrastructure augmentation to support long-term development.

In addition to the substation capacity enhancement, TPSOOL has completed refurbishment of the 33 KV line connecting the Sunabeda Grid Substation to the Sunabeda Primary Substation. Old and weak conductors were replaced with new, high-quality conductors. The internal system of the substation was also strengthened through the installation of a new bus bar arrangement to safely handle higher electrical loads.

The upgraded 33 KV line and reinforced substation system are now capable of handling peak load conditions, improving operational safety and overall system efficiency. The strengthened infrastructure will also support future expansion without affecting service quality.

Commenting on the development, Mr. Anil Kumar Garg, CEO, TPSOOL, said that the company is continuously upgrading its power infrastructure in fast-developing urban and semi-urban areas to meet rising electricity demand. He said Sunabeda is emerging as an important growth centre, and reliable power supply is essential to support industrial, commercial and residential development. He added that the upgrade reflects TPSOOL's commitment to providing stable, quality and uninterrupted power supply while contributing to economic growth and improved quality of life.

\* 7000 Consumers to be benefited.

Bhubaneswar, February: TP Southern Odisha Distribution Limited (TPSOOL) has strengthened the power distribution infrastructure in Sunabeda, Keonjhar district, by enhancing substation capacity and upgrading key transmission systems. The initiative aims to improve voltage stability, ensure reliable power supply, and support the region's growing electricity demand.

As part of the initiative, TPSOOL commissioned a new 8 MVA power transformer at the Sunabeda Primary Substation, increasing the total substation capacity from 11.3 MVA to 16.15 MVA. The enhancement has been undertaken to resolve voltage-related issues and to support the increasing power load in Sunabeda and surrounding areas.

Previously, the Sunabeda Primary Substation was operating with three transformers of 3.15 MVA, 3.15 MVA and 5 MVA capacity. In view of the rising load, TPSOOL replaced one 3.15 MVA transformer with a higher-capacity 8 MVA transformer. The substation is now operating with transformers of 3.15 MVA, 5 MVA and 8 MVA, enabling better load distribution and improved system reliability.

Following the capacity enhancement, voltage levels across the network have improved significantly. Power supply has become more stable, and load management has improved across the entire system. The upgraded configuration will also allow smoother power arrangements during maintenance works, reducing inconvenience to consumers.

Around 7,000 consumers in and around Sunabeda will benefit from the infrastructure strengthening. Areas including Sunabeda NAC Thane, Sunabeda NAC Runk, public offices, water supply installations, judgoda and parts of Santiguda Block are expected to receive improved and more reliable electricity supply, with fewer voltage fluctuations.

Sunabeda is a key industrial and urban centre in Keonjhar district and holds strategic importance in southern Odisha. The township houses the Engine Division of Hindustan Aeronautics Limited (HAL), a major defence public sector undertaking of the Government of India. The presence of HAL has contributed significantly to industrial activity, urban growth and employment in the region. Sunabeda is also known for its scenic surroundings, tribal culture and tourism potential.

With rapid urbanization, expansion of residential areas, growth of commercial establishments and increasing economic activity, electricity demand in Sunabeda has been rising steadily. Keeping future requirements in mind, TPSOOL planned and executed the present infrastructure augmentation to support long-term development.

In addition to the substation capacity enhancement, TPSOOL has completed refurbishment of the 33 KV line connecting the Sunabeda Grid Substation to the Sunabeda Primary Substation. Old and weak conductors were replaced with new, high-quality conductors. The internal system of the substation was also strengthened through the installation of a new bus bar arrangement to safely handle higher electrical loads.

The upgraded 33 KV line and reinforced substation system are now capable of handling peak load conditions, improving operational safety and overall system efficiency. The strengthened infrastructure will also support future expansion without affecting service quality.

Commenting on the development, Mr. Anil Kumar Garg, CEO, TPSOOL, said that the company is continuously upgrading its power infrastructure in fast-developing urban and semi-urban areas to meet rising electricity demand. He said Sunabeda is emerging as an important growth centre, and reliable power supply is essential to support industrial, commercial and residential development. He added that the upgrade reflects TPSOOL's commitment to providing stable, quality and uninterrupted power supply while contributing to economic growth and improved quality of life.

## Reliable Power Boost For Sunabeda

TPSODL

\* 2000 Consumers to be benefited

Bhubaneswar, February 17: Southern Odisha Distribution Limited (TPSODL) has strengthened the power distribution infrastructure in Sunabeda, Koraput district, by enhancing substation capacity and upgrading key transmission systems. The initiative aims to improve voltage stability, ensure reliable power supply, and support the region's growing electricity demand.

As part of the initiative, TPSODL commissioned a new 3 MVA power transformer at the Sunabeda Primary Substation, increasing the total substation capacity from 11.2 MVA to 16.15 MVA. The enhancement has been instrumental in ensuring uninterrupted power and to support the increasing power load in Sunabeda and surrounding areas.

Previously, the Sunabeda Primary Substation was operating with three transformers of 2.15 MVA, 3.15 MVA and 5.95 MVA capacity. In view of the rising load, TPSODL replaced two 3.15 MVA transformers with a higher capacity 3 MVA transformer. The substation is now operating with transformers of 2.15 MVA, 3 MVA and 3 MVA, enabling better load distribution and improved system reliability.

Following the capacity enhancement, voltage levels across the network have improved significantly. Power quality has become more stable, and asset management has improved across the entire system. The upgraded infrastructure will also allow smoother power arrangements during maintenance works, reducing inconvenience to consumers.

Around 1,800 consumers in and around Sunabeda will benefit from the infrastructure strengthening. Areas including Sunabeda NMC Town, Sunabeda NMC Road, public offices, water supply installations, and public works of Development Bank are expected to receive improved and more reliable electricity supply, with fewer voltage fluctuations.

Sunabeda is a key industrial and urban centre in Koraput district and holds strategic importance in southern Odisha. The township houses the Capital Division of Hindustan Aluminium Limited (HAL), a major defence public sector undertaking of the Government of India. The presence of HAL has contributed significantly to industrial activity, urban growth and employment in the region. Sunabeda is also known for its scenic surroundings, tribal culture and tourism potential.

With rapid urbanisation, expansion of residential areas, growth of commercial establishments and increasing economic activity, electricity demand in Sunabeda has been rising steadily. Keeping future requirements in mind, TPSODL planned and executed the present infrastructure augmentation to support long-term development.

In addition to the substation capacity enhancement, TPSODL has completed reinforcement of the 33 kV line connecting the Sunabeda Grid Substation to the Sunabeda Primary Substation. Old and weak conductors were replaced with new, high-quality conductors. The internal system of the substation was also strengthened through the installation of a new bus bar arrangement to safely handle higher electrical loads.

The upgraded 33 kV line and reinforced substation system are now capable of handling peak load conditions, improving operational safety and overall system efficiency. The strengthened infrastructure will also support future expansion without affecting service quality.

Commenting on the achievement, Mr. Jitendra Kumar Singh, CEO, TPSODL, said that the company is continuously upgrading its power infrastructure to meet developing urban and semi-urban areas to meet rising electricity demand. He said Sunabeda is an emerging urban growth centre, and reliable power supply is essential to support industrial, commercial and residential development. He added that the upgrade reflects TPSODL's commitment to providing stable, quality and uninterrupted power supply while contributing to economic growth and improved quality of life.

## **TPSODL Organises Blood Donation Camps, Collects 106 Units of Blood**

**Berhampur, February:** TPSODL organised blood donation camps at Jeypore and Malkangiri, reaffirming its commitment to community health and social responsibility. The initiative saw active participation from TPSODL employees and their family members, who voluntarily came forward to donate blood and support this life-saving cause.

At Jeypore, the blood donation camp was inaugurated by Mr. Manmath Nath Mishra, Circle Head, Jeypore, in the presence of TPSODL employees. A total of 58 units of blood were voluntarily donated by employees and their family members. The camp witnessed enthusiastic participation and a strong spirit of service.

In Malkangiri, the camp was held at the Division office and inaugurated by Mr. Bedabara Pradhan, ADM (Revenue), Malkangiri, in the presence of TPSODL employees. Employees and their family members actively participated in the camp and donated 48 units of blood. The initiative received strong support and reflected the organisation's commitment to community welfare.

Speaking on the occasion, Mr. Amit Kumar Garg, CEO, TPSODL, said, "Blood donation is a simple act that can save lives. Through such initiatives, our employees continue to show empathy and a deep sense of responsibility towards society. TPSODL remains committed to contributing to the health and well-being of the communities we serve."

**TPSODL Organises Blood Donation Camps, Collects 106 Units of Blood**

By Odishabarta, February 16, 2026

Bhubaneswar, Odishabarta

Bhubaneswar, 16th February, 2026: TPSODL organised blood donation camps at Jeypore and Malkangiri, reaffirming its commitment to community health and social responsibility.

The initiative saw active participation from TPSODL employees and their family members, who voluntarily came forward to donate blood and support this life-saving cause.

At Jeypore, the blood donation camp was inaugurated by Mr. Manmuth Nath Mishra, Circle Head, Jeypore, in the presence of TPSODL employees. A total of 50 units of blood were voluntarily donated by employees and their family members. The camp witnessed enthusiastic participation and a strong spirit of service.

In Malkangiri, the camp was held at the Division office and inaugurated by Mr. Balabara Pradhan, ADM (Revenue), Malkangiri, in the presence of TPSODL employees. Employees and their family members actively participated in the camp and donated 48 units of blood.

The initiative received strong support and reflected the organisation's commitment to community welfare.

Speaking on the occasion, Mr. Amit Kumar Garg, CEO, TPSODL, said, "Blood donation is a simple act that can save lives. Through such initiatives, our employees continue to show empathy and a deep sense of responsibility towards society. TPSODL remains committed to contributing to the health and well-being of the communities we serve."

**PRESS RELEASE**

## TPSODL Launches 'Project SAATHI' to Empower BA Families

**Berhampur:** TP Southern Odisha Distribution Limited has launched Project SAATHI – Touching BA Lives, designed to promote inclusive growth and strengthen engagement with Business Associates (BAs) employees and their families. This pilot project, kicked off from Lathi village, Berhampur, will build a supportive ecosystem for BA employees through education, livelihood opportunities, and healthcare.

The Project includes Pragati Path, a scholarship support for students and helps them enrol in government ITI or diploma colleges, providing them a path to their goal. Along with this, the Margdarshan initiative will provide them with career and financial guidance, helping them achieve holistic and long-term benefits.

Adding to this, the "Aarogya Parivar" will provide accessible healthcare to the BA employees and their families through the Sanjivini Mobile Health Dispensary. The camps focus on preventive care and general health check up followed by an awareness session.

Providing a glimpse of services under the initiatives at the launch event in Lathi, Konisi, Berhampur—attended by more than 65 BA employees and their families—a health checkup camp was also conducted to promote well-being. The Dhaaga and Dhoopbatti Centres were also displayed at the event, encouraging families to participate in income-generation and entrepreneurship opportunities.

Speaking on the occasion, Mr. Amit Kumar Garg, CEO, TPSODL stated, "Project SAATHI reflects our belief that growth is truly meaningful when it includes every member of our extended workforce. By investing in education, health, and livelihood development, we aim to build stronger, self-reliant communities that progress alongside TPSODL."

Through such initiatives, TPSODL continues its journey of empowerment, partnership, and shared community progress across Southern Odisha.

### समावेशी विकास की ओर टीपीएसओडीएल का कदम प्रोजेक्ट साथी से बदलेगी बीए परिवारों की तस्वीर

भुवनेश्वर। टीपी साउदर्न ओडिशा डिस्ट्रीब्यूशन लिमिटेड (टीपीएसओडीएल) ने अपने बिजनेस एसोसिएट्स (बीए) कर्मचारियों और उनके परिवारों के समग्र विकास के उद्देश्य से प्रोजेक्ट साथी टचिंग बीए लाइव्स का शुभारंभ बरहमपुर के लथी गांव से किया गया। इसका उद्देश्य शिक्षा, आजीविका और स्वास्थ्य सेवाओं के माध्यम से बीए कर्मचारियों के लिए एक सहायक और सहायक इकोसिस्टम तैयार करना है। प्रोजेक्ट के तहत प्रगति पथ पहल के माध्यम से छात्रवृत्तियों को छात्रवृत्ति सहायता प्रदान की जाएगी। इसके अतिरिक्त, उन्हें सरकारी आईटीआई या डिप्लोमा कॉलेजों में नामांकन के लिए मार्गदर्शन और सहायता मिलेगी, जिससे वे अपने करियर लक्ष्यों को दिशा में आगे बढ़ सकें। इसके साथ ही मार्गदर्शन पहल के अंतर्गत छात्रों और परिवारों को करियर काउंसलिंग और वित्तीय परामर्श दिया जाएगा। इसका उद्देश्य शैक्षणिक और समग्र लाभ सुनिश्चित करना है, ताकि परिवार आर्थिक रूप से आत्मनिर्भर बन सकें।

आरोग्य परिवार से स्वास्थ्य सुरक्षा-स्वास्थ्य के क्षेत्र में अत्याधुनिक पहल के

कार्यक्रम में भाग और भूखण्ड केंद्रों को इन्फो भी प्रस्तुत की गई, जिससे परिवारों को आपस में जुड़ने और उद्यमिता के अवसरों के प्रति प्रेरित किया गया। यह पहल महिलाओं और युवाओं को स्वयंसेवा की दिशा में आगे बढ़ने में सहायक होगी। इस अवसर पर टीपीएसओडीएल के सीईओ अमित कुमार गर्ग ने कहा, प्रोजेक्ट साथी हमारी इस सोच को दर्शाता है कि विकास तभी सार्थक है जब हमारे विस्तारित कार्यक्षेत्र का हर सदस्य इसके लाभ उठा सके। शिक्षा, स्वास्थ्य और आजीविका में निवेश कर हम मजबूत और आत्मनिर्भर समुदायों का निर्माण कर रहे हैं। इस पहल के माध्यम से टीपीएसओडीएल दक्षिण ओडिशा में सार्वजनिककरण, आजीविका और सामुदायिक प्रगति को दिशा में आगे बढ़ाने को और मजबूत कर रहा है।

तहत बीए कर्मचारियों और उनके परिवारों को संजीवनी मोबाइल हेल्थ डिस्पेंसरी के माध्यम से सुलभ स्वास्थ्य सेवाएं प्रदान की जाएंगी। स्वास्थ्य शिबिरों में सामान्य स्वास्थ्य जांच, निगरान देखभाल और जनसंख्या सत्र आयोजित किए जाएंगे।

लथी, कोनिसी, बरहमपुर में आयोजित शिबिर कार्यक्रम में 65 से अधिक बीए कर्मचारियों और उनके परिवार शामिल हुए। कार्यक्रम के दौरान एक स्वास्थ्य जांच शिबिर भी संचालित किया गया, जिसमें लोगों ने उपाहारपूर्वक भाग लिया।

### टीपीएसओडीएल ने दक्षिण ओडिशा में शुरू किया 'प्रोजेक्ट साथी'

जागरण संवाददाता, भुवनेश्वर: टीपी सादर्न ओडिशा डिस्ट्रीब्यूशन लिमिटेड (टीपीएसओडीएल) ने 'प्रोजेक्ट साथी' की शुरुआत की है, जिसका उद्देश्य सहयोगी कर्मचारियों और उनके परिवारों के सर्वांगीण विकास को बढ़ावा देना है। इस पहल का औपचारिक शुभारंभ बरहमपुर के लथी गांव में किया गया, जिसमें 65 से अधिक कर्मचारियों और उनके परिवारों ने भाग लिया।

'प्रोजेक्ट साथी' के तहत विभिन्न योजनाओं के माध्यम से शिक्षा, आजीविका और स्वास्थ्य के क्षेत्र में सहयोग प्रदान किया जाएगा। 'प्रगति पथ' योजना के अंतर्गत कर्मचारियों के बच्चों को छात्रवृत्ति दी जाएगी और सरकारी आईटीआई तथा डिप्लोमा कॉलेजों में नामांकन के दौरान आवश्यक सहायता प्रदान की जाएगी। साथ ही, 'आरोग्य परिवार' पहल के अंतर्गत संजीवनी मोबाइल हेल्थ यूनिट के माध्यम से कर्मचारियों और उनके परिवारों को स्वास्थ्य जांच और चिकित्सकीय सेवाएं उपलब्ध कराई जाएंगी। टीपीएसओडीएल के मुख्य कार्यकारी अधिकारी अमित कुमार गर्ग ने कहा कि परियोजना का मुख्य उद्देश्य सहयोगी कर्मचारियों को कुशल और सशक्त मानव संसाधन में परिवर्तित करना है।

**Berhampur:** TP Southern Odisha Distribution Limited has launched Project SAATHI – Touching BA Lives, designed to promote inclusive growth and strengthen engagement with Business Associates (BA) employees and their families. This pilot project, kicked off from Lathi village, Berhampur, will build a supportive ecosystem for BA employees through education, livelihood opportunities, and healthcare.

The Project includes Pragati Path, a scholarship support for students and helps them enroll in government ITI or diploma colleges, providing them a path to their goal. Along with this, the Mentorship initiative will provide them with career and financial guidance, helping them achieve holistic and long-term benefits.

Adding to this, the "Aarogya Parivar" will provide accessible healthcare to the BA employees and their families through the Sanjivni Mobile Health Dispensary. The camps focus on preventive care and general health check up followed by an awareness session.

Providing a glimpse of services under the initiatives at the launch event in Lathi, Kania, Berhampur—attended by more than 60 BA employees and their families—a health checkup camp was also conducted to promote well-being. The Dhanga and Dhoochatti Centres were also displayed at the event, encouraging families to participate in income-generation and entrepreneurship opportunities.

Speaking on the occasion, Mr. Amit Kumar Garg, CEO, TPSODL, stated, "Project SAATHI reflects our belief that growth is truly meaningful when it includes every member of our extended workforce. By investing in education, health, and livelihood development, we aim to build stronger, self-reliant communities that progress alongside TPSODL."

Through such initiatives, TPSODL continues its journey of empowerment, partnership, and shared community progress across Southern Odisha.

BERHAMPUR, FEBRUARY 12, 2024

TP Southern Odisha Distribution Limited has launched Project SAATHI – Touching BA Lives – to foster inclusive growth and deepen engagement with Business Associates (BA) employees and their families. The pilot initiative, launched from Lathi village in Berhampur, seeks to create a supportive ecosystem through focused interventions in education, livelihood opportunities and healthcare.

The project features Pragati Path, a scholarship programme that supports students in enrolling in government ITI or diploma institutions, enabling them to pursue structured career pathways. Complementing this, the Mentorship programme offers career counselling and financial guidance to help beneficiaries achieve long-term, sustainable progress.

Under the Aarogya Parivar initiative, accessible healthcare services are being delivered to BA employees and their families through the Sanjivni Mobile Health Dispensary. The camps emphasize preventive care, general health check-ups and awareness sessions to promote overall well-being.

At the launch event in Lathi, Kania, Berhampur, attended by more than 60 BA employees and their family members, a health screening camp was organised as a demonstration of the programme's services. Dhanga and Dhoochatti centres were also showcased, encouraging family members to explore income-generation and micro-entrepreneurship opportunities.

Speaking on the occasion, TPSODL CEO Amit Kumar Garg said the initiative reflects the organisation's belief that growth becomes meaningful only when it includes every member of its extended workforce, adding that investments in education, health and livelihoods would help build self-reliant communities alongside the company's progress.

Through Project SAATHI, TPSODL aims to strengthen empowerment, partnership and shared community development across southern Odisha.

## **TPSODL Launches 'Gaja Sanrakshana Project' to Mitigate Human–Elephant Conflict in Southern Odisha**

**Berhampur, Odisha:** TP Southern Odisha Distribution Limited (TPSODL), a joint venture of Tata Power and the Government of Odisha, has launched the 'Gaja Sanrakshana Project' to mitigate human–elephant conflict through structured collaboration and preventive infrastructure measures. The pilot initiative is being implemented in the Ghumsur North Forest Division, Bhanjanagar, in partnership with SNEHA NGO. The project aims to reduce elephant electrocution incidents, strengthen community awareness, and enhance coordination between the Forest Department and the power utility. It reinforces TPSODL's continued commitment to biodiversity conservation and community safety in Southern Odisha.

The project covers four forest ranges under the Ghumsur North Forest Division—Majhagada, Tarasing, Gallery and Jagannathprasad—areas that witness frequent elephant movement and associated risks. Designed as a convergence model, the initiative integrates community participation with technical interventions to prevent accidents and create a responsive safety mechanism in vulnerable pockets.

As part of the initiative, 114 electrocution threat spots have been identified across the four ranges of the division. Targeted corrective measures are being planned and implemented at these vulnerable locations to minimize the risk of accidental contact with live conductors. The initiative also includes sustained awareness campaigns through wall paintings, village-level interactions and street plays, promoting safe practices and encouraging harmonious coexistence with wildlife.

TPSODL has already undertaken several infrastructure-strengthening measures in elephant-prone areas to mitigate such risks. Around 190 kilometres of bare conductors have been replaced with insulated conductors to prevent accidental electrocution, while nearly 1,000 intermediate poles have been erected to improve line stability and reduce sagging of overhead wires in forested corridors.

Speaking on the occasion, Mr. Amit Kumar Garg, CEO, TPSODL, said, "The Gaja Sanrakshana Project reflects our deep commitment towards biodiversity

conservation and community well-being. By working closely with the Forest Department and local communities, we aim to create a sustainable and preventive framework to reduce human–elephant conflict. Together, we can ensure safety for both people and wildlife.”

Mr. Himanshu Sekhar Mohanty, DFO, Ghumsur North Forest Division, said, “This is a very welcome step by TPSODL. With better cooperation between TPSODL and the Forest Department, we will collectively work to fulfil the objectives of this initiative and reduce human–elephant conflicts.”

The launch event was held at the Corporate Office of TPSODL in the presence of Mr. Pradeep Ghoshal - Head CSR, Odisha DISCOMs, Mr. Abhijit Padhi, Circle Head, Bhanjanagar, Mr. Dillip Kumar Sahoo, Head CSR along with senior officials from TPSODL, the Ghumsur North Forest Division and SNEHA NGO.

Through the Gaja Sanrakshana Project, TPSODL strengthens not only power distribution safety but also its role as a responsible corporate committed to protecting biodiversity and promoting sustainable coexistence between communities and wildlife in Southern Odisha.

## TPSODL launches 'Gaja Sanrakshana Project' to mitigate man-elephant conflict

**STATESMAN NEWS SERVICE**  
Berhampur, 20 February

TP Southern Odisha Distribution Limited (TPSODL), a joint venture of Tata Power and the Government of Odisha, has launched the 'Gaja Sanrakshana Project' to mitigate human-elephant conflict through structured collaboration and preventive infrastructure measures.

The pilot initiative is being implemented in the Ghumsur North Forest Division, Bhanjanagar, in partnership with SNEHA NGO. The project aims to reduce elephant electrocution incidents, strengthen community awareness, and enhance coordination between the Forest Department and the power utility.

The project covers four forest ranges under the Ghumsur North Forest Division—Majhagada, Tarasing, Gallery and Jagannathprasad—areas

that witness frequent elephant movement and associated risks.

Designed as a convergence model, the initiative integrates community participation with technical interventions to prevent accidents and create a responsive safety mechanism in vulnerable pockets, stated a release issued by the discom.

As part of the initiative, 114 electrocution threat spots have been identified across the four ranges of the division. Targeted corrective measures are being planned and implemented at these vulnerable locations to minimize the risk of accidental contact with live conductors.

Around 190 kilometres of bare conductors have been replaced with insulated conductors to prevent accidental electrocution, while nearly 1,000 intermediate poles have been erected to improve line stability and reduce sagging of overhead wires in forested corridors.

Mr. Amit Kumar Garg, CEO, TPSODL, said, "By working closely with the Forest Department and local communities, we aim to create a sustainable and preventive framework to reduce human-elephant conflict. Together, we can ensure safety for both people and wildlife."

Mr. Himanshu Sekhar Mohanty, DFO, Ghumsur North Forest Division, said, "With better cooperation between TPSODL and the Forest Department, we will collectively work to fulfil the objectives of this initiative and reduce human-elephant conflicts."

The launch event was held at the Corporate Office of TPSODL in the presence of Mr. Pradeep Ghoshal - Head CSR, Odisha DISCOMs, Mr. Abhijit Padhi, Circle Head, Bhanjanagar, Mr. Dillip Kumar Sahoo, Head CSR along with senior officials from TPSODL, the Ghumsur North Forest Division and SNEHA NGO.

## TPSODL launches 'Gaja Sanrakshana Project' to mitigate human-elephant conflict in southern Odisha

**PBD BUREAU**

BERHAMPUR, FEB 19

AS part of efforts to mitigate human-elephant conflict in southern Odisha, TP Southern Odisha Distribution Limited (TPSODL), a joint venture of Tata Power, has launched the 'Gaja Sanrakshana Project'. The pilot initiative is being implemented in the Ghumsur, North Forest Division, Bhanjanagar in partnership with SNEHA NGO. It aims to prevent elephant electrocution, enhance community awareness and improve coordination between the Forest Department and the power utility.

The project covers four forest ranges – Majhagada, Tarasing, Gallery and Jagannathprasad – where frequent elephant movement poses risks to both wildlife and local communities. Conceived as a convergence model, the initiative integrates technical interventions with

community participation to create a structured safety mechanism in vulnerable areas.

Under the project, 114 electrocution-prone spots have been identified across the division. Targeted corrective measures are being implemented at these locations to minimise accidental contact with live conductors. Awareness drives, including wall paintings, village-level interactions and street plays, are also being conducted to promote safe practices and encourage coexistence with wildlife.

In addition, TPSODL has strengthened power infrastructure in elephant-prone zones. Nearly 190 km of bare conductors have been

replaced with insulated lines to reduce electrocution risks, and about 1,000 intermediate poles have been erected to improve line stability and prevent sagging of overhead wires in forest corridors.

Speaking on the occasion, Amit Kumar Garg, CEO of TPSODL, said the initiative reflects coordinated efforts with the Forest Department and local communities to build a preventive framework for addressing human-elephant conflict.

Himanshu Sekhar Mohanty, Divisional Forest Officer of the Ghumsur North Forest Division, said improved cooperation between the Forest Department and TPSODL would help achieve the objectives of the initiative.

The project was launched at TPSODL's corporate office in the presence of Pradeep Ghoshal, Head CSR, Odisha DISCOMs; Abhijit Padhi, Circle Head, Bhanjanagar; Dillip Kumar Sahoo, Head CSR; and senior officials of TPSODL, the Ghumsur North Forest Division and SNEHA NGO.

# मानव-हाथी संघर्ष पर 'गज संरक्षण' का कवच

हाथियों की सुरक्षा को जागरूकता कार्यक्रम • नगराज

जागरण संवाददाता, भुवनेश्वर: मानव-हाथी संघर्ष को बढ़ती घटनाओं को कम करने के उद्देश्य से टीपीएसओडीएल ने 'गज संरक्षण' परियोजना शुरू की है। स्वीच्छिक संस्था स्नेहा के सहयोग से यह परियोजना घुमुसर उत्तर वन मंडल में पायलट आधार पर लागू की गई है। परियोजना का लक्ष्य हाथियों को बिजली के करंट से होने वाली दुर्घटनाओं से बचाना, संवेदनशील क्षेत्रों में जागरूकता बढ़ाना और वन तथा विद्युत विभाग के बीच बेहतर समन्वय स्थापित करना है।

प्रारंभिक चरण में माजगड़ा, तारासिंह, गलंगरी और जगन्नाथप्रसाद वन रेंज को शामिल किया गया है, जहां हाथियों की निर्यात आवाजाही रहती है। परियोजना के तहत प्रतिक्रिया-आधारित सुरक्षा प्रणाली के साथ दुर्घटना-चेची हाइब्रिड मॉडल अपनाया गया है। कंपनी ने बिजली से जुड़े जोखिम वाले 114 स्थानों की पहचान

कर आवश्यक सुधार कार्य पूरे किए हैं। साथ ही वन क्षेत्रों से सटे गांवों में दीवार चित्रण, पथ-नाटक, ग्राम सभाएं और सामुदायिक जागरूकता कार्यक्रम आयोजित किए जा रहे हैं, ताकि मानव-वन्यजीव सह-अस्तित्व को बढ़ावा मिल सके। संभावित खतरे वाले इलाकों में बिजली टांचे को मजबूत करते हुए लगभग 190 किलोमीटर खुले तारों को कवर तारों में बदला गया है। खंभों के बीच की दूरी कम करने के लिए एक हजार से अधिक अतिरिक्त खंभे लगाए गए हैं। टीपीएसओडीएल के मुख्य कार्यकारी अधिकारी अमित कुमार गर्ग ने इसे जीव विविधता संरक्षण और सामुदायिक कल्याण की दिशा में महत्वपूर्ण कदम बताया। घुमुसर उत्तर वन मंडल के अधिकारी हिमांशु शेखर महांती ने पहल की सराहना करते हुए विभागीय सहयोग से परियोजना को सफल बनाने का भरोसा जताया।

## TPSODL Launches 'Gaja Sanrakshana Project' to Mitigate Human-Elephant Conflict in Southern Odisha

Berhampur, (Correspondent): TP Southern Odisha Distribution Limited (TPSODL), a joint venture of Tata Power and the Government of Odisha, has launched the 'Gaja Sanrakshana Project' to mitigate human-elephant conflict through structured collaboration and preventive infrastructure measures. The pilot initiative is being implemented in the Ghumsur North Forest

Division, Bhanjanagar, in partnership with SNEHA NGO. The project aims to reduce elephant electrocution incidents, strengthen community awareness, and enhance coordination between the Forest Department and the power utility. It reinforces TPSODL's continued commitment to biodiversity conservation and community safety in Southern Odisha. The project covers four forest ranges under the Ghumsur North

Forest Division—Majhagada, Turasing, Gallery and Jagannathprasad—areas that witness frequent elephant movement and associated risks. Designed as a convergence model, the initiative integrates community participation with technical interventions to prevent accidents and create a responsive safety mechanism in vulnerable pockets.

## मानव-हाथी संघर्ष कम करने के लिए 'गज संरक्षण प्रोजेक्ट' की शुरुआत

टीपीएस ओडीएल ने घुमुसर में शुरू किया पायलट प्रोजेक्ट, दक्षिण ओडिशा में हाथी दुर्घटनाओं पर लगेगा ब्रेक

नवभारत ब्यूरो। भुवनेश्वर।

दक्षिण ओडिशा में बढ़ते मानव-हाथी संघर्ष को कम करने के उद्देश्य से टीपीएसओडीएल डिस्ट्रीब्यूशन लिमिटेड (टीपीएसओडीएल) ने 'गज संरक्षण प्रोजेक्ट' की शुरुआत की है। टटा पावर और ओडिशा सरकार के संयुक्त उपक्रम के रूप में संघटित यह पहल संरक्षित सहयोग और निष्पक्ष बुनियादी ढांचा उपकरणों के जरूरत हाथियों की विद्युत दुर्घटनाओं को रोकने पर केंद्रित है।

यह पायलट परियोजना घुमुसर उत्तर वन प्रभाग के भंजानगर क्षेत्र में लागू की जा रही है, जिसमें स्नेहा एनजीओ सहयोग के रूप में जुड़ा है। परियोजना का उद्देश्य हाथियों के करंट लगने को

घटनाओं को कम करना, समुदायों में जागरूकता बढ़ाना और वन विभाग तथा बिजली विभाग कंपनी के बीच बेहतर समन्वय स्थापित करना है।

टीपीएसओडीएल ने पहले ही हमी-प्रभाषा इलाकों में करीब 190 किलोमीटर नए तारों को इन्सुलेटेड

कंडक्टर से बदला है। साथ ही, लगभग 1,000 इंटरमीडिएट पोल लगाए गए हैं ताकि ओवरहेड तारों को स्थिरता बंदे और तारों के झूलने की समस्या कम हो।

टीपीएसओडीएल के सीईओ अमित कुमार गर्ग ने कहा कि यह परियोजना जीव विविधता संरक्षण और सामुदायिक

#### चार वन रेंज में लागू होगा प्रोजेक्ट

यह पहल घुमुसर नॉर्थ फॉरेस्ट डिवीजन के चार रेंज (माजगड़ा, तारासिंह, गैलरी और जगन्नाथप्रसाद) को कवर करती है। इन क्षेत्रों में हाथियों की आवाजाही अधिक रहती है, जिसमें दुर्घटनाओं का खतरा बना रहता है। परियोजना को 'कन्वर्जेंस मॉडल' के रूप में तैयार किया गया है, जिसमें तकनीकी सुधारों के साथ समुदायिक भागीदारी को जोड़ा गया है।

#### 114 संवेदनशील स्थानों की पहचान

परियोजना के तहत 114 ऐसे स्थानों की पहचान की गई है जहां करंट लगने का खतरा अधिक है। इन स्थानों पर सुधारकार्य किया जा रहा है ताकि खुले तारों से होने वाली दुर्घटनाओं को रोका जा सके। इसके अलावा दीवार लेखन, पथ-नाटक और पुस्तक-नाटक के जरिए जागरूकता अभियान भी चलाया जाएगा।

सुरक्षा के प्रति कंपनी की प्रतिबद्धता को दर्शाती है। वहीं, घुमुसर नॉर्थ फॉरेस्ट डिवीजन के डीएफओ हिमांशु शेखर महांती ने इसे अत्यांतयोग्य कदम काजो हुए विभागीय समन्वय को मजबूत करने

को बात कही। लॉन्ग-कॉर्सेज टपीएसओडीएल के कॉर्पोरेट कार्यालय में आयोजित हुआ, जिसमें बरिष्ठ अधिकारी और वन विभाग के प्रतिनिधि मौजूद रहे।

**TPSODL Launches 'Gaja Sanrakshana Project' To Mitigate Human-Elephant Conflict In Southern Odisha**

Bhubaneswar: The Southern Odisha Distribution Limited (TPSODL) has launched the 'Gaja Sanrakshana Project' to mitigate human-elephant conflict through structured collaboration and preventive infrastructure measures.

The pilot initiative is being implemented by the Ghumsur North Forest Division, Bhanjanagar, in partnership with SNEHA NGO. The project aims to reduce elephant electrocution incidents, strengthen community awareness, and enhance coordination between the Forest Department and the power utility. It reinforces TPSODL's continued commitment to biodiversity conservation and community safety in Southern Odisha. The project covers four forest ranges under the Ghumsur North Forest Division—Majhaqada, Tarsaling, Gattory and Jagannathprasad—areas that witness frequent elephant movement and associated risks. Designed as a convergence model, the initiative integrates community participation with technical interventions to prevent accidents and create a responsive safety mechanism in vulnerable pockets.

As part of the initiative, 114 electrocution threat spots have been identified across the four ranges of the division. Targeted corrective measures are being planned and implemented at these vulnerable locations to minimize the risk of accidental contact with live conductors. The initiative also includes sustained awareness campaigns through wall paintings, village-level interactions and street plays, promoting safe practices and encouraging harmonious coexistence with wildlife.

TPSODL has already undertaken several infrastructure-strengthening measures in elephant-prone areas to mitigate such risks. Around 190 kilometres of bare conductors have been replaced with insulated conductors to prevent accidental electrocution, while nearly 1,000 intermediate poles have been erected to improve line stability and reduce sagging of overhead wires in forested corridors.

Speaking on the occasion, Amit Kumar Garg, CEO, TPSODL, said, "The Gaja Sanrakshana Project reflects our deep commitment towards biodiversity conservation and community well-being. By working closely with the Forest Department and local communities, we aim to create a sustainable and preventive framework to reduce human-elephant conflict. Together, we can ensure safety for both people and wildlife."

Himanshu Sekhar Mohanty, DFO, Ghumsur North Forest Division, said, "This is a very welcome step by TPSODL. With better cooperation between TPSODL and the Forest Department, we will collectively work to fulfil the objectives of this initiative and reduce human-elephant conflicts."

The launch event was held at the Corporate Office of TPSODL in the presence of Mr. Pradeep Ghoshal – Head CSR, Odisha DISCOMs, Mr. Abhijit Padhi, Circle Head, Bhanjanagar, Dilip Kumar Sahoo, Head CSR along with senior officials from TPSODL, the Ghumsur North Forest Division and SNEHA NGO. Through the Gaja Sanrakshana Project, TPSODL strengthens not only power distribution safety but also its role as a responsible corporate committed to protecting biodiversity and promoting sustainable coexistence between communities and wildlife in Southern Odisha.

**TPSODL Launches 'Gaja Sanrakshana Project' to Mitigate Human-Elephant Conflict in Southern Odisha**

Berhampur: TP Southern Odisha Distribution Limited (TPSODL), a joint venture of Tata Power and the Government of Odisha, has launched the 'Gaja Sanrakshana Project' to mitigate human-elephant conflict through structured collaboration and preventive infrastructure measures. The pilot initiative is being implemented in the Ghumsar North Forest Division, Bhanjanagar, in partnership with SNEHA NGO. The project aims to reduce elephant electrocution incidents, strengthen community awareness, and enhance coordination between the Forest Department and the power utility. It reinforces TPSODL's continued commitment to biodiversity conservation and community safety in Southern Odisha.

The project covers four forest ranges under the Ghumsar North Forest Division—Majhagada, Tarasing, Gallery and Jagannathprasad—areas that witness frequent elephant movement and associated risks. Designed as a convergence model, the initiative integrates community participation with technical interventions to prevent accidents and create a responsive safety mechanism in vulnerable pockets.

As part of the initiative, 114 electrocution threat spots have been identified across the four ranges of the division. Targeted corrective measures are being planned and implemented at these vulnerable locations to minimize the risk of accidental contact with live conductors. The initiative also includes sustained awareness campaigns through wall paintings, village-level interactions and street plays, promoting safe practices and encouraging harmonious coexistence with wildlife.

TPSODL has already undertaken several infrastructure-strengthening measures in elephant-prone areas to mitigate such risks. Around 190 kilometres of bare conductors have been replaced with insulated conductors to prevent accidental electrocution, while nearly 1,000 intermediate poles have been erected to improve line stability and reduce sagging of overhead wires in forested corridors.

Speaking on the occasion, Mr. Amit Kumar Garg, CEO, TPSODL, said, "The Gaja Sanrakshana Project reflects our deep commitment towards biodiversity conservation and community well-being. By working closely with the Forest Department and local communities, we aim to create a sustainable and preventive framework to reduce human-elephant conflict. Together, we can ensure safety for both people and wildlife."

Mr. Hiranshu Sekhar Mohanty, GPO, Ghumsar North Forest Division, said, "This is a very welcome step by TPSODL. With better cooperation between TPSODL and the Forest Department, we will collectively work to fulfil the objectives of this initiative and reduce human-elephant conflicts."

The launch event was held at the Corporate Office of TPSODL in the presence of Mr. Pradeep Ghoshal – Head CSR, Odisha DISCOMs, Mr. Abhjit Patni, Circle Head, Bhanjanagar, Mr. Dilip Kumar Sahoo, Head CSR along with senior officials from TPSODL, the Ghumsar North Forest Division and SNEHA NGO.

Through the Gaja Sanrakshana Project, TPSODL strengthens not only power distribution safety but also its role as a responsible corporate committed to protecting biodiversity and promoting sustainable coexistence between communities and wildlife in Southern Odisha.

TP Southern Odisha Distribution Limited (TPSODL), a joint venture of Tata Power and the Government of Odisha, has launched the 'Gaja Sanrakshana Project' to mitigate human-elephant conflict through structured collaboration, preventive infrastructure, and community participation measures. The pilot initiative is being implemented in the Ghumsur North Forest Division at Bhanjanagar in partnership with SNEHA NGO. The project aims to reduce elephant electrocution incidents, strengthen government awareness, and improve coordination between the Forest Department and the power utility. It reinforces TPSODL's continued commitment to biodiversity conservation and community safety across Southern Odisha.

The initiative spans four forest ranges under the Ghumsur-North Forest Division, Tarasing, Gallery and Jagannathprasad—areas that witness frequent elephant movement and associated risks. Designed as a convergence model, the programme integrates local community participation with technical interventions to prevent accidents and establish a responsive safety mechanism in vulnerable pockets where accidental human-elephant encounters with live conductors occur.

Under the project, 114 electrocution threat spots have been identified across the four targeted forest ranges and are being planned and implemented at these critical locations to minimize the risk of accidental contact with the conductors by elephants. In parallel, sustained awareness campaigns are being carried out through wall paintings, village-level meetings and street plays, promoting safe practices, timely reporting of incidents, and a culture of coexistence with wildlife.

TPSODL has already undertaken several infrastructure-strengthening measures in elephant-prone areas to mitigate such risks. Around 190 kilometres of bare conductors have been replaced with insulated conductors to prevent accidental electrocution, while nearly 1,000 intermediate poles have been erected to improve line stability and reduce sagging of overhead wires in forested corridors.

Speaking on the occasion, Ashwini Kishor, CEO, TPSODL, said, "The Gaja Sanrakshana Project reflects our deep commitment towards biodiversity conservation and community well-being. By working closely with the Forest Department and local communities, we aim to create a sustainable and preventive framework to reduce human-elephant conflict. Together, we can ensure safety for both people and wildlife."

Shrikanth Kumar Mishra, CEO, Ghumsur North Forest Division, said, "This is a new initiative led by TPSODL. With close cooperation between TPSODL and the Forest Department, we will undertake work to kill the elephant in this initiative and reduce human-elephant conflicts."

The launch event was held at the TPSODL Corporate Office in Bhubaneswar in the presence of Pradyumn Choudhary, Head CSR, Odisha (TPSODL), Siddhartha Prasad, Chief Guest, Bhanjanagar, Odisha Forest Division, along with senior officials from TPSODL, the Ghumsur North Forest Division and SNEHA NGO.

Through the Gaja Sanrakshana Project, TPSODL is strengthening an early detection system to locate human-elephant encounters and promptly respond when required to prevent fatalities and prevent avoidable long-term consequences to human communities and elephants across Southern Odisha.

## TPSODL launches 'Gaja Sanrakshana Project' to mitigate human–elephant conflict in Southern Odisha

Berhampur(18/02/2024): TP Southern Odisha Distribution Limited (TPSODL), a joint venture of Tata Power and the Government of Odisha, has launched the 'Gaja Sanrakshana Project' to mitigate human–elephant conflict through structured collaboration and preventive infrastructure measures.

The pilot initiative is being implemented in the Ghumsur North Forest Division, Bhanjanagar, in partnership with SNEHA NGO.

The project aims to reduce elephant electrocution incidents, strengthen community awareness, and enhance coordination between the Forest Department and the power utility.

It reinforces TPSODL's continued commitment to biodiversity conservation and community safety in Southern Odisha. The project covers four forest ranges under the Ghumsur North Forest Division—Majhagada, Tarasing, Galery and Jagannathprasad—areas that witness frequent elephant movement and associated risks.

Designed as a convergence model, the initiative integrates community participation with technical interventions to prevent accidents and create a responsive safety mechanism in vulnerable pockets. As part of the initiative, 74 electrocution threat spots have been identified across the four ranges of the division.

Targeted corrective measures are being planned and implemented at these vulnerable locations to minimize the risk of accidental contact with live conductors.

The initiative also includes sustained awareness campaigns through wall paintings, village-level interactions and street plays, promoting safe practices and encouraging harmonious coexistence with wildlife. TPSODL has already undertaken several infrastructure-strengthening measures in elephant-prone areas to mitigate such risks.

Around 180 kilometres of bare conductors have been replaced with insulated conductors to prevent accidental electrocution, while nearly 1,000 intermediate poles have been erected to improve line stability and reduce sagging of overhead wires in forested corridors. Speaking on the occasion, Amit Kumar Garg, CEO, TPSODL, said, "The Gaja Sanrakshana Project reflects our deep commitment towards biodiversity conservation and community well-being.

By working closely with the Forest Department and local communities, we aim to create a sustainable and preventive framework to reduce human–elephant conflict.

Together, we can ensure safety for both people and wildlife." Himanshu Sekhar Mahanty, DFO, Ghumsur North Forest Division, said, "This is a very welcome step by TPSODL.

With better cooperation between TPSODL and the Forest Department, we will collectively work to fulfil the objectives of this initiative and reduce human–elephant conflicts." The launch event was held at the Corporate Office of TPSODL in the presence of Pradeep Ghoshal - Head CSR, Odisha DISCOM, Abhjit Padhi, Circle Head, Bhanjanagar, Dilip Kumar Sahoo, Head CSR along with senior officials from TPSODL, the Ghumsur North Forest Division and SNEHA NGO.

Through the Gaja Sanrakshana Project, TPSODL strengthens not only power distribution safety but also its role as a responsible corporate committed to protecting biodiversity and promoting sustainable coexistence between communities and wildlife in Southern Odisha.

## TPSODL Launches 'Gaja Sanrakshana Project' to Mitigate Human-

## **Koraput's Remote Pockets Get Reliable Power; Over 2,000 Consumers Benefit**

**Berhampur, February:** TP Southern Odisha Distribution Limited (TPSODL), a joint venture between Tata Power and the Government of Odisha has commissioned a new 33 KV line of 4.73 Circuit Kilometres (CKM) at Marthamput in Lamtaput Block of Koraput district, marking a significant milestone in strengthening power infrastructure in the remote and hilly regions of southern Odisha. The initiative is set to enhance reliability, resilience, and quality of power supply for over 2,000 consumers in the area.

Located in the Southernmost part of Odisha along the Andhra Pradesh border, Koraput district forms part of the Eastern Ghats hill range and is characterised by undulating terrain, dense forests, scattered tribal habitations, and high rainfall during the monsoon season. The challenging topography of Lamtaput block has historically posed operational constraints in maintaining uninterrupted electricity supply, especially during adverse weather conditions when access for maintenance and fault restoration becomes difficult.

The newly commissioned 33 KV feeder will benefit consumers across Guneipada, Godihanjr, Jalahanjar, Chikenput, Anokadli and Badigada under Lamtaput Block. Earlier, power to Marthamput Primary Substation (PSS) was supplied through a 70-km-long 33 KV line originating from Sunabeda Grid Substation (GSS), passing through dense forests and hilly terrain. This often resulted in delayed fault detection and prolonged outages, particularly during the monsoon.

With the commissioning of the independent feeder from Lamtaput Grid Substation (GSS), Marthamput PSS now receives a dedicated power supply source, substantially reducing dependency on the longer line. Additionally, an N-1 contingency arrangement has been established through the Nandapur feeder, ensuring that in case of any fault or maintenance requirement on one line, an alternate source can seamlessly maintain supply.

This development will significantly reduce voltage fluctuations, improve supply stability, and ensure faster restoration during breakdowns. For households, it means dependable lighting, better support for students, and improved quality of life. For farmers and small businesses, it ensures stable power for irrigation,

agro-processing, and livelihood activities. Public institutions such as schools, healthcare centres, and community facilities will also benefit from enhanced reliability.

Mr. Amit Kumar Garg, CEO, TPSODL, stated, “The commissioning of the 33 KV independent feeder at Marthamput reflects our focused efforts to strengthen infrastructure in geographically challenging regions. With a dedicated supply line and built-in backup arrangement, consumers will experience improved reliability and quicker restoration. We remain committed to delivering dependable and quality power supply across our operational areas.”

This initiative reinforces TPSODL’s commitment to inclusive development by ensuring that even the remotest habitations of southern Odisha are supported by robust and resilient power infrastructure.

**ORISSA POST**

**BERHAMPUR:** TP Southern Odisha Distribution Limited (TPSODL), a joint venture of Tata Power and the Government of Odisha, has commissioned a 4.73 circuit-km 33-kV line at Marthampur in Lamtaput block of Koraput district, strengthening power infrastructure in the region. More than 2,000 consumers are expected to benefit. Located along the Andhra Pradesh border in the Eastern Ghats, Koraput's hilly terrain, dense forests and heavy monsoon rains have long posed challenges to maintaining uninterrupted supply. Earlier, Marthampur Primary Substation received power through a 70-km 33-kV line from Sunabeda Grid Substation, often leading to delays in fault detection and restoration. The new feeder from Lamtaput Grid Substation provides a dedicated source of supply, reducing dependence on the longer line. An N-1 contingency arrangement through the Nandapur feeder ensures backup during faults or maintenance. The project is expected to reduce voltage fluctuations, improve stability and speed up restoration. Households, farmers, small businesses, schools and health centres are likely to see improved service reliability. TPSODL CEO Amit Kumar Garg said the initiative reflects the company's focus on strengthening infrastructure in geographically challenging areas and delivering reliable power across its operational region.

**TPSODL commissions 33 kV line to boost power supply in Koraput's remote areas**

**PBD BUREAU**

**BERHAMPUR, FEB 23**

IN a major boost to power infrastructure in southern Odisha, over 2,000 consumers in the remote and hilly areas of Koraput district are set to receive improved and reliable electricity supply following the commissioning of a new 33 kV line at Marthampur in Lamtaput block by TP Southern Odisha Distribution Limited (TPSODL).

The 4.73 circuit kilometre (CKM) line has been commissioned to strengthen power infrastructure in the southernmost parts of Odisha along the Andhra Pradesh border. Koraput, part of the Eastern Ghats hill range, is characterised by undulating terrain,

dense forests, scattered tribal habitations and heavy monsoon rainfall, factors that have historically posed challenges in maintaining uninterrupted electricity supply.

The newly commissioned feeder will benefit consumers in Guneipada, Godihanjr, Jalahanjar, Chikenput, Anokadli and Badigada under Lamtaput block. Earlier, the Marthampur Primary Substation (PSS) was supplied through a 70-km-long 33 kV line from the Sunabeda Grid Substation (GSS), passing through

forested and hilly terrain, often resulting in delayed fault detection and prolonged outages, particularly during the monsoon season.

With the commissioning of an independent feeder from the Lamtaput Grid Substation (GSS), Marthampur PSS now has a dedicated source of power supply, reducing reliance on the longer line. An N-1 contingency arrangement has also been

established through the Nandapur feeder to ensure alternate supply during faults or maintenance.

According to the company, the development will help reduce voltage fluctuations, improve supply stability and enable faster restoration during breakdowns, benefiting households, farmers, small businesses and public institutions such as schools and healthcare centres.

Amit Kumar Garg, CEO of TPSODL, said the commissioning of the independent feeder reflects the company's efforts to strengthen infrastructure in geographically challenging regions and improve reliability and restoration time for consumers.

# Koraput's Remote Pockets Get Reliable Power; Over 2,000 Consumers Benefit

**AROUND ODISHA**

Berhampur, (Correspondent): TP Southern Odisha Distribution Limited (TPSODL), a joint venture between Tata Power and the Government of Odisha has commissioned a new 33 KV line of 4.73 Circuit Kilometres (CKM) at Marthampur in Lamtaput Block of Koraput district, marking a significant milestone in strengthening power infrastructure in the remote and hilly regions of southern Odisha. The initiative is set to enhance reliability, resilience, and quality of power supply for over 2,000 consumers in the area. Located in the Southernmost part of Odisha along the Andhra Pradesh border, Koraput district forms part of the Eastern Ghats hill range and is characterised by undulating terrain, dense

forests, scattered tribal habitations, and high rainfall during the monsoon season. The challenging topography of Lamtaput block has historically posed operational constraints in maintaining uninterrupted electricity supply, especially during adverse weather conditions when access for maintenance and fault restoration becomes difficult. The newly commissioned 33 KV feeder will benefit consumers across Guneipada, Godihanjr, Jalahanjar, Chikenput, Anokadli and Badigada under Lamtaput Block. Earlier, power to Marthampur Primary Substation (PSS) was supplied through a 70-km-long 33 KV line originating from Sunabeda Grid Substation (GSS), passing through dense forests and hilly terrain. This often resulted in delayed fault detection and prolonged outages, particularly during the monsoon.

## Koraput's Remote Pockets Get Reliable Power; Over 2,000 Consumers Benefit

Berhampur, (ENS): TP Southern Odisha Distribution Limited (TPSODL), a joint venture between Tata Power and the Government of Odisha has commissioned a new 33 KV line of 4.73 Circuit Kilometres (CKM) at Marthampur in Lamtaput Block of Koraput district, marking a significant milestone in strengthening power infrastructure in the remote and hilly regions of southern Odisha. The initiative is set to enhance reliability, resilience, and quality of power supply for over 2,000 consumers in the area.

Located in the Southernmost part of Odisha along the Andhra Pradesh border, Koraput district forms part of the Eastern Ghats hill range and is characterised by undulating terrain, dense forests, scattered tribal habitations, and high rainfall during the monsoon season. The

challenging topography of Lamtaput block has historically posed operational constraints in maintaining uninterrupted electricity supply, especially during adverse weather conditions when access for maintenance and fault restoration becomes difficult. The newly commissioned 33 KV feeder will benefit consumers across Guneipada, Godihanjr, Jalahanjar, Chikenput, Anokadli and Badigada under Lamtaput Block. Earlier, power to Marthampur Primary Substation (PSS) was supplied through a 70-km-long 33 KV line originating from Sunabeda Grid Substation (GSS), passing through dense forests and hilly terrain. This often resulted in delayed fault detection and prolonged outages, particularly during the monsoon.

With the commissioning of the independent feeder from

Lamtaput Grid Substation (GSS), Marthampur PSS now receives a dedicated power supply source, substantially reducing dependency on the longer line. Additionally, an N-1 contingency arrangement has been established through the Nandapur feeder, ensuring that in case of any fault or maintenance requirement on one line, an alternate source can seamlessly maintain supply.

This development will significantly reduce voltage fluctuations, improve supply stability, and ensure faster restoration during breakdowns. For households, it means dependable lighting, better support for students, and improved quality of life. For farmers and small businesses, it ensures stable power for irrigation, agro-processing, and livelihood activities. Public institutions such as schools,

# Koraput's Remote Pockets Get Reliable Power; Over 2,000 Consumers Benefit

Berhampur, February (B. News): TP Southern Odisha Distribution Limited (TPSODL), a joint venture between Tata Power and the Government of Odisha has commissioned a 33 KV line originating from Sunabeda Grid Substation (GSS), passing through dense forests and hilly terrain. This often resulted in delayed fault detection and prolonged out-

ages, particularly during the monsoon. With the commissioning of the independent feeder from Lamtaput Grid Substation (GSS), Marthampur PSS now receives a dedicated power supply source, substantially reducing dependency on the longer line. Additionally, an N-1 contingency arrangement has been established through the Nandapur feeder, ensuring that in case of any fault or maintenance requirement on one line, an alternate source can

seamlessly maintain supply. This development will significantly reduce voltage fluctuations, improve supply stability, and ensure faster restoration during breakdowns. For households, it means dependable lighting, better support for students, and improved quality of life. For farmers and small businesses, it ensures stable power for irrigation, agro-processing, and livelihood activities. Public institutions such as schools, healthcare centres, and community facilities will also benefit from enhanced reliability. Mr. Amit Kumar Garg, CEO, TPSODL, stated, "The commissioning of the 33 KV independent feeder at Marthampur reflects our focused efforts to strengthen infrastructure in geographically challenging regions. With a dedicated supply line and built-in backup arrangement, consumers will experience improved reliability and quicker restoration. We remain committed to delivering dependable and quality power supply across our operational areas." This initiative reinforces TPSODL's commitment to inclusive development by ensuring that even the remotest habitations of southern Odisha are supported by robust and resilient power infrastructure.

### दुर्गम क्षेत्र को मिली भरसेमंद बिजली, दो हजार से अधिक लाभान्वित

ओडिशा के दुर्गम क्षेत्र में नई 33 केवी लाइन का शुभारंभ करते अधिकारी • जाग्रण

जागरण संबद्धता, भुवनेश्वर: दक्षिण ओडिशा के दुर्गम और पहाड़ी इलाकों में बिजली व्यवस्था को मजबूत करने की दिशा में अहम कदम उठाते हुए टीपी सादरन ओडिशा डिस्ट्रीब्यूशन लिमिटेड (टीपीएसओडीएल) ने कोरापुट जिले के लमटापुट ब्लॉक स्थित मरथामपुट में 4.73 सर्किट किलोमीटर लंबी नई 33 केवी लाइन सफलतापूर्वक चालू कर दी है। टाटा पावर और ओडिशा सरकार के संयुक्त उपक्रम को इस पहल से क्षेत्र के 2,000 से अधिक उपभोक्ताओं को स्थिर और विश्वसनीय बिजली आपूर्ति का लाभ मिलेगा।

आंध्र प्रदेश सीमा से स्टे कोरापुट जिले में दुर्गम भू-भाग, घने जंगल और भारी वर्षा के कारण बिजली

आपूर्ति अक्सर बाधित होती रही है। लमटापुट में अब तक 70 किलोमीटर लंबी 33 केवी लाइन पर निर्भरता थी, जिससे फॉल्ट सुधार में देरी होती थी। नई व्यवस्था के तहत लमटापुट ग्रिड सबस्टेशन से मरथामपुट प्राथमिक उपकेंद्र को स्वतंत्र 33 केवी फीडर से जोड़ा गया है। साथ ही नंदपुर फीडर के माध्यम से एन-1 वैकल्पिक आपूर्ति व्यवस्था भी को गई है। इससे गुनेईपाड़ा, गोदिहंजर, जलाहंजर, चिकेनपुट, अनोकडली और बड़िगड़ा गांवों के उपभोक्ताओं को सीधा लाभ मिलेगा। टीपीएसओडीएल के सीईओ अमित कुमार गर्ग ने कहा कि मजबूत अवसंरचना से उपभोक्ताओं को बेहतर गुणवत्ता की बिजली मिलेगी।

**Koraput's remote pockets get reliable power**

Posted by IW News Service | Feb 23, 2025 | Business |

Berhampur: TP Southern Odisha Distribution Limited (TPSODL) has commissioned a new 33 KV line of 4.73 Circuit Kilometres (CKM) at Marthampur in Lamtaput Block of Koraput district, marking a significant milestone in strengthening power infrastructure in the remote and

hilly regions of southern Odisha. The initiative is set to enhance reliability, resilience, and quality of power supply for over 2,000 consumers in the area.

The newly commissioned 33 KV feeder will benefit consumers across Gonespada, Godhanj, Jakharij, Chikempur, Anokadi and Badigata under Lamtaput Block.

The challenging topography of Lamtaput block has historically posed operational constraints in maintaining uninterrupted electricity supply, especially during adverse weather conditions when access for maintenance and fault restoration becomes difficult.

Earlier, power in Marthampur Primary Substation (PSS) was supplied through a 70 km long 33 KV line originating from Surabada Grid Substation (GSS), passing through dense forests and hilly terrain. This often resulted in delayed fault detection and prolonged outages, particularly during the monsoon.

With the commissioning of the independent feeder from Lamtaput Grid Substation (GSS), Marthampur PSS now receives a dedicated power supply source, substantially reducing dependency on the longer line. Additionally, an N-1 contingency arrangement has been established through the Marthampur Feeder, ensuring that in case of any fault or maintenance requirement on one line, an alternate source can seamlessly maintain supply.

TPSODL CEO Amit Kumar Garg said, "The commissioning of the 33 KV independent feeder at Marthampur reflects our focused efforts to strengthen infrastructure in geographically challenging regions. With a dedicated supply line and built-in backup arrangement, consumers will experience improved reliability and quicker restoration. We remain committed to delivering dependable and quality power supply across our operational areas."

## Koraput's Remote Pockets Get Reliable Power; Over 2,000 Consumers Benefit

By Kalinga Voice

Last updated Feb 23, 2026

NEWS/10

Berhampur, February: TP Southern Odisha Distribution Limited (TPSODL), a joint venture between Tata Power and the Government of Odisha has commissioned a new 33 KV line of 4.73 Circuit Kilometres (CKM) at Marthampur in Lamtaput Block of Koraput district, marking a significant milestone in strengthening power infrastructure in the remote and hilly regions of southern Odisha. The initiative is set to enhance reliability, resilience, and quality of power supply for over 2,000 consumers in the area.

Located in the southernmost part of Odisha along the Andhra Pradesh border, Koraput district forms part of the Eastern Ghats hill range and is characterised by undulating terrain, dense forests, scattered tribal habitations, and high rainfall during the monsoon season. The challenging topography of Lamtaput block has historically posed operational constraints in maintaining uninterrupted electricity supply, especially during adverse weather conditions when access for maintenance and fault restoration becomes difficult.

The newly commissioned 33 KV feeder will benefit consumers across Guneipada, Godihonji, Jalahanji, Chikraput, Anokadi and Badigada under Lamtaput Block. Earlier, power to Marthampur Primary Substation (PSS) was supplied through a 70-km-long 33 KV line originating from Sunabeda Grid Substation (GSS) passing through dense forests and hilly terrain. This often resulted in delayed fault detection and prolonged outages, particularly during the monsoon.

With the commissioning of the independent feeder from Lamtaput Grid Substation (GSS), Marthampur PSS now receives a dedicated power supply source, substantially reducing dependency on the longer line. Additionally, an N-1 contingency arrangement has been established through the Nandapur feeder, ensuring that in case of any fault or maintenance requirement on one line, an alternate source can seamlessly maintain supply.

This development will significantly reduce voltage fluctuations, improve supply stability, and ensure faster restoration during breakdowns. For households, it means dependable lighting, better support for students, and improved quality of life. For farmers and small businesses, it ensures stable power for irrigation, agro-processing, and livelihood activities. Public institutions such as schools, healthcare centres, and community facilities will also benefit from enhanced reliability.

Mr. Amit Kumar Garg, CEO, TPSODL, stated, "The commissioning of the 33 KV independent feeder at Marthampur reflects our focused efforts to strengthen infrastructure in geographically challenging regions. With a dedicated supply line and built-in backup arrangement, consumers will experience improved reliability and quicker restoration. We remain committed to delivering dependable and quality power supply across our operational areas."

This initiative reinforces TPSODL's commitment to inclusive development by ensuring that even the remotest habitations of southern Odisha are supported by robust and resilient power infrastructure.

**Koraput's Remote Pockets Get Reliable Power; Over 2,000 Consumers Benefit |**

odishabarta.com/koraput-remote-pockets-get-reliable-power-over-2000-consumers-benefit

odshabarta

February 24, 2025

Berhampur, February: TP Southern Odisha Distribution Limited (TPSODL), a joint venture between Tata Power and the Government of Odisha has commissioned a new 33 KV line of 4.73 Circuit Kilometres (CKM) at Marthampur in Lamtaput Block of Koraput district, marking a significant milestone in strengthening power infrastructure in the remote and hilly regions of southern Odisha. The initiative is set to enhance reliability, resilience, and quality of power supply for over 2,000 consumers in the area.

Located in the Southernmost part of Odisha along the Andhra Pradesh border, Koraput district forms part of the Eastern Ghats hill range and is characterised by undulating terrain, dense forests, scattered tribal habitations, and high rainfall during the monsoon season. The challenging topography of Lamtaput block has historically posed operational constraints in maintaining uninterrupted electricity supply, especially during adverse weather conditions when access for maintenance and fault restoration becomes difficult.

The newly commissioned 33 KV feeder will benefit consumers across Guneipada, Godhanjr, Jalahanjar, Chikenput, Anokadli and Badigada under Lamtaput Block. Earlier, power to Marthampur Primary Substation (PSS) was supplied through a 70-km-long 33 KV line originating from Sunabeda Grid Substation (GSS), passing through dense forests and hilly terrain. This often resulted in delayed fault detection and prolonged outages, particularly during the monsoon.

With the commissioning of the independent feeder from Lamtaput Grid Substation (GSS), Marthampur PSS now receives a dedicated power supply source, substantially reducing dependency on the longer line. Additionally, an N-1 contingency arrangement has been established through the Nandapur feeder, ensuring that in case of any fault or maintenance requirement on one line, an alternate source can seamlessly maintain supply.

This development will significantly reduce voltage fluctuations, improve supply stability, and ensure faster restoration during breakdowns. For households, it means dependable lighting, better support for students, and improved quality of life. For farmers and small businesses, it ensures stable power for irrigation, agro-processing, and livelihood activities. Public institutions such as schools, healthcare centres, and community facilities will also benefit from enhanced reliability.

Mr. Amit Kumar Garg, CEO, TPSODL, stated, "The commissioning of the 33 KV independent feeder at Marthampur reflects our focused efforts to strengthen infrastructure in geographically challenging regions. With a dedicated supply line and built-in backup arrangement, consumers will experience improved reliability and quicker restoration. We remain committed to delivering dependable and quality power supply across our operational areas."

This initiative reinforces TPSODL's commitment to inclusive development by ensuring that even the remotest habitations of southern Odisha are supported by robust and resilient power infrastructure.

## TPSODL Inaugurates Hands-On Technical Training Centre in Jeypore

### - Strengthening Skills and Advancing 'Mission Zero Harm'

**Berhampur, February:** Accelerating its commitment to safety, capability building, and skill development, TP Southern Odisha Distribution Limited (TPSODL) inaugurated a state-of-the-art Hands-On Technical Training Centre (HoTT) at Jeypore in Koraput district. The facility was formally inaugurated by Mr. Amit Kumar Garg, CEO, TPSODL.

The HoTT Centre, established under the aegis of the TPSODL Safety and Skill Development Institute (TSSDI), marks a significant milestone in the company's "Mission Zero Harm" initiative. The centre reflects TPSODL's focused approach to build a highly skilled, safety-conscious and future-ready workforce across its operational areas.

Strategically designed for employees and Business Associates, the centre delivers a structured blend of classroom learning and practical exposure. The training model emphasizes real-time simulation of field conditions and hands-on technical practice.

At the core of the facility is a modern practice yard equipped with replicas of Low Tension (LT) and High Tension (HT) networks. This simulated infrastructure enables linemen and technical staff to gain direct experience in handling equipment and executing operational tasks in a safe and controlled environment before field deployment.

The centre offers comprehensive modules covering RMU operations, auto-recloser handling, sectionalizer operations, distribution transformer maintenance, proper earthing techniques and insulation resistance testing. In addition, the facility houses a dedicated TSSDI classroom, a fully equipped conference hall, an Electrical Equipment Demonstration Gallery, and a well-developed practice yard that supports immersive technical learning. All essential amenities have been incorporated to ensure a professional and effective training environment.

Safety awareness is visibly integrated across the campus through impactful wall art, visual communication boards, and instructional displays. These elements reinforce safe work practices and strengthen the culture of accountability at every level.

Addressing the gathering, Mr. Amit Kumar Garg stated, "Safety and skill excellence remain central to our operations at TPSODL. The Jeypore HoTT Centre represents a strategic investment in our workforce. Structured practical exposure in a simulated

environment enhances technical capability and strengthens our zero-harm commitment. Our objective is clear — build confident, competent teams that deliver reliable power with the highest safety standards.”

With the commissioning of the Jeypore facility, TPSODL now operates 16 TSSDI centres and three advanced HoTT centres across its license area. The earlier HoTT centres at Berhampur and Phulbani have strengthened workforce capability in their respective regions. The addition of Jeypore further expands TPSODL’s robust training ecosystem.

Through sustained investment in safety infrastructure and human capital development, TPSODL continues to set higher benchmarks in the power distribution sector and remains committed to delivering reliable, efficient, and safe power supply across Southern Odisha.

The inauguration event was graced by senior officials and colleagues.

**TPSODL inaugurates Hands-On Technical Training Centre at Jeypore**

**PBD BUREAU**

**BERHAMPUR, MAR 1**

ACCELERATING its commitment to safety, capability building, and skill development, TP Southern Odisha Distribution Limited (TPSODL) inaugurated a Hands-On Technical Training Centre (HoTT) at Jeypore in Koraput. The facility was formally inaugurated by Amit Kumar Garg, CEO, TPSODL.

Established under the aegis of the TPSODL Safety and Skill Development Institute (TSSDI), the centre is part of the company's "Mission Zero Harm" initiative. It is designed to develop a skilled and safety-conscious workforce through structured classroom sessions and practical training.

The centre includes a modern practice yard with replicas of Low Tension (LT) and High Tension (HT) networks to simulate field conditions. This infrastructure enables linemen and technical staff to gain direct experience in handling equipment and controlled environment before field deployment.

Training modules cover

RMU operations, auto-recloser handling, sectionalizer operations, distribution transformer maintenance, earthing techniques and insulation resistance testing. The facility also houses a dedicated classroom, a conference hall, an Electrical Equipment Demonstration Gallery and a practice yard to support technical learning.

Safety awareness measures have been integrated across the campus through wall art, visual communication boards and instructional displays to reinforce safe work practices.

Addressing the gathering, Garg said the Jeypore HoTT Centre represents a strategic investment in the workforce and would enhance technical capability while strengthening the company's zero-harm commitment.

With the commissioning of the Jeypore facility, TPSODL now operates 16 TSSDI centres and three advanced HoTT centres across its licence area. The earlier HoTT centres at Berhampur and Phulbani are operational in their respective regions.

## ‘मिशन जीरो हार्म’ को मिलेगा बल, तकनीकी दक्षता पर जोर

**DAINIK  
JAGRAN**

**जागरण संवाददाता, भुवनेश्वर :** दक्षिण ओडिशा में सुरक्षित और विश्वसनीय बिजली आपूर्ति को सुदृढ़ बनाने की दिशा में टाटा पावर सदर्न ओडिशा डिस्ट्रीब्यूशन लिमिटेड (टीपीएसओडीएल) ने एक महत्वपूर्ण पहल की है। कंपनी ने कोरापुट जिले के जयपुर में अत्याधुनिक हैंड्स-ऑन टेक्निकल ट्रेनिंग सेंटर की स्थापना की है। इस प्रशिक्षण केंद्र का उद्घाटन टीपीएसओडीएल के सीईओ अमित कुमार गर्ग ने किया।

टीपीएसओडीएल सेफ्टी एंड स्क्रिल डेवलपमेंट इंस्टीट्यूट के अंतर्गत स्थापित यह केंद्र कंपनी की महत्वाकांक्षी पहल ‘मिशन जीरो हार्म’ को मजबूती प्रदान करेगा। इसका उद्देश्य कर्मचारियों और बिजनेस एसोसिएट्स को तकनीकी रूप से दक्ष बनाते हुए सुरक्षा मानकों के प्रति अधिक जागरूक करना है।

केंद्र की विशेषता यह है कि यहां सैद्धांतिक शिक्षा के साथ-साथ फोल्ड जैसी वास्तविक परिस्थितियों में व्यावहारिक प्रशिक्षण दिया जाएगा।

ट्रेनिंग सेंटर का उद्घाटन करते टीपीएसओडीएल के सीईओ अमित कुमार गर्ग।

इसके लिए अत्याधुनिक प्रैक्टिस यार्ड विकसित किया गया है, जिसमें लो टेंशन और हाई टेंशन नेटवर्क की प्रतिकृतियां स्थापित की गई हैं। इससे लाइनमैन और तकनीकी कर्मचारी फोल्ड में कार्य शुरू करने से पहले

सुरक्षित वातावरण में अभ्यास कर सकेंगे। प्रशिक्षण केंद्र में आरएमयू ऑपरेशन, ऑटो रिक्लोजर हैंडलिंग, सेक्शनलाइजर संचालन, डिस्ट्रीब्यूशन ट्रांसफॉर्मर मॉडर्नाइजेशन, अर्ध-तकनीकी तंत्र इंसुलेशन रीजिस्ट्रेंस टेस्टिंग जैसे

महत्वपूर्ण विषयों पर विशेष प्रशिक्षण दिया जाएगा। इसके अलावा यहां आधुनिक कक्षाएं, पूरे तरह सुसज्जित कॉन्फ्रेंस हॉल, इलेक्ट्रिकल उपकरणों की डेमोस्ट्रेशन गैलरी और विस्तृत प्रैक्टिस यार्ड की सुविधा उपलब्ध है।

# टीपीएस ओडीएल का जयपुर में आधुनिक प्रशिक्षण केंद्र उद्घाटित

भुवनेश्वर। सुरक्षा और कौशल विकास को प्राथमिकता देते हुए टीपी सदरन ओडिशा डिस्ट्रीब्यूशन लिमिटेड ने कोरापुट जिले के जयपुर में अत्याधुनिक हैंड्स-ऑन टेक्निकल ट्रेनिंग सेंटर का उद्घाटन किया। केंद्र का उद्घाटन कंपनी के सीईओ अमित कुमार गर्ग ने किया। यह पहल कंपनी के ‘मिशन जीरो हार्म’ के तहत कार्यबल को और अधिक दक्ष एवं सुरक्षा-सचेत बनाने की दिशा में महत्वपूर्ण कदम है। यह केंद्र टीपीएसओडीएल सेफ्टी एंड स्क्रिल डेवलपमेंट इंस्टीट्यूट के अंतर्गत स्थापित किया गया है। यहां कर्मचारियों और बिजनेस एसोसिएट्स को कक्षा शिक्षण के साथ व्यावहारिक प्रशिक्षण दिया जाएगा। केंद्र में एक आधुनिक प्रैक्टिस यार्ड तैयार किया गया है, जिसमें लो टेंशन और हाई टेंशन नेटवर्क के मॉडल लगाए गए हैं, ताकि तकनीकी कर्मचारी फोल्ड में जाने से

पहले सुरक्षित वातावरण में वास्तविक परिस्थितियों का अभ्यास कर सकें।

प्रशिक्षण मॉड्यूल में आरएमयू संचालन, ऑटो-रीक्लोजर हैंडलिंग, सेक्शनलाइजर संचालन, डिस्ट्रीब्यूशन ट्रांसफॉर्मर मॉडर्नाइजेशन, अर्ध-तकनीकी और इंसुलेशन रीजिस्ट्रेंस टेस्टिंग शामिल हैं। परिसर में एक सुसज्जित कक्षा, कॉन्फ्रेंस हॉल, इलेक्ट्रिकल इक्विपमेंट डेमोस्ट्रेशन गैलरी

और विस्तृत अभ्यास क्षेत्र की सुविधा उपलब्ध है। सुरक्षा जागरूकता को बढ़ावा देने के लिए परिसर में विभिन्न सूचना बोर्ड और विजुअल डिस्ट्रिब्यूट लगाए गए हैं। टीपीएसओडीएल के सीईओ अमित कुमार गर्ग ने कहा कि यह केंद्र तकनीकी दक्षता बढ़ाने और कार्यस्थल पर सुरक्षा मानकों को मजबूत करने में अहम भूमिका निभाएगा।

Bhubaneswar: Accelerating its commitment to safety, capability building, and skill development, TP Southern Odisha Distribution Limited (TPSODL) inaugurated a state-of-the-art Hands-On Technical Training Centre (HoTT) at Jeypore in Koraput district. The facility was formally inaugurated by TPSODL CEO Arnit Kumar Garg.

[Odisha Business Directory](#)

The HoTT Centre, established under the aegis of the TPSODL Safety and Skill Development Institute (TSSDI), marks a significant milestone in the company's "Mission Zero Harm" initiative. The centre reflects TPSODL's focused approach to build a highly skilled, safety-conscious and future-ready workforce across its operational areas.

Strategically designed for employees and Business Associates, the centre delivers a structured blend of classroom learning and practical exposure. The training model emphasizes real-time simulation of field conditions and hands-on technical practice.

At the core of the facility is a modern practice yard equipped with replicas of Low Tension (LT) and High Tension (HT) networks. This simulated infrastructure enables linemen and technical staff to gain direct experience in handling equipment and executing operational tasks in a safe and controlled environment before field deployment.

The centre offers comprehensive modules covering RMU operations, auto-recloser handling, sectionaliser operations, distribution transformer maintenance, proper earthing techniques and insulation resistance testing. In addition, the facility houses a dedicated TSSDI classroom, a fully equipped conference hall, an Electrical Equipment Demonstration Gallery, and a well-developed practice yard that supports immersive technical learning. All essential amenities have been incorporated to ensure a professional and effective training environment.

Safety awareness is visibly integrated across the campus through impactful wall art, visual communication boards, and instructional displays. These elements reinforce safe work practices and strengthen the culture of accountability at every level.

Addressing the gathering, Arnit Kumar Garg stated, "Safety and skill excellence remain central to our operations at TPSODL. The Jeypore HoTT Centre represents a strategic investment in our workforce. Structured practical exposure in a simulated environment enhances technical capability and strengthens our zero-harm commitment. Our objective is clear — build confident, competent teams that deliver reliable power with the highest safety standards."

With the commissioning of the Jeypore facility, TPSODL now operates 16 TSSDI centres and three advanced HoTT centres across its license area. The earlier HoTT centres at Bhubaneswar and Phulbani have strengthened workforce capability in their respective regions. The addition of Jeypore further expands TPSODL's robust training ecosystem.

– Strengthening Skills and Advancing ‘Mission Zero Harm’

By Prakash Panigrahi

**Berhampur, February:** Accelerating its commitment to safety, capacity building, and skill development, TP Southern Odisha Distribution Limited (TPSODL) inaugurated a state-of-the-art Hands-On Technical Training Centre (HoTT) at Jeypore in Koraput district. The facility was formally inaugurated by Mr. Amit Kumar Garg, CEO, TPSODL.

The HoTT Centre, established under the aegis of the TPSODL Safety and Skill Development Institute (TSSDI), marks a significant milestone in the company’s ‘Mission Zero Harm’ initiative. The centre reflects TPSODL’s focused approach to build a highly skilled, safety-conscious and future-ready workforce across its operational areas.

Strategically designed for employees and Business Associates, the centre delivers a structured blend of classroom learning and practical exposure. The training model emphasizes real-time simulation of field conditions and hands-on technical practice.

At the core of the facility is a modern practice yard equipped with replicas of Low Tension (LT) and High Tension (HT) networks. This simulated infrastructure enables linemen and technical staff to gain direct experience in handling equipment and executing operational tasks in a safe and controlled environment before field deployment.

The centre offers comprehensive modules covering RMU operations, auto-recloser handling, sectionalizer operations, distribution transformer maintenance, proper earthing techniques and insulation resistance testing. In addition, the facility houses a dedicated TSSDI classroom, a fully equipped conference hall, an Electrical Equipment Demonstration Gallery, and a well-developed practice yard that supports immersive technical learning. All essential amenities have been incorporated to ensure a professional and effective training environment.

Safety awareness is visibly integrated across the campus through impactful wall art, visual communication boards, and instructional displays. These elements reinforce safe work practices and strengthen the culture of accountability at every level.

Addressing the gathering, Mr. Amit Kumar Garg stated, ‘Safety and skill excellence remain central to our operations at TPSODL. The Jeypore HoTT Centre represents a strategic investment in our workforce. Structured practical exposure in a simulated environment enhances technical capability and strengthens our zero-harm commitment. Our objective is clear — build confident, competent teams that deliver reliable power with the highest safety standards.’

With the commissioning of the Jeypore facility, TPSODL now operates 16 TSSDI centres and three advanced HoTT centres across its license area. The earlier HoTT centres at Berhampur and Phulbani have strengthened workforce capability in their respective regions. The addition of Jeypore further expands TPSODL’s robust training ecosystem.

Through sustained investment in safety infrastructure and human capital development, TPSODL continues to set higher benchmarks in the power distribution sector and remains committed to delivering reliable, efficient, and safe power supply across Southern Odisha.

The inauguration event was graced by senior officials and colleagues.

BERHAMPUR, FEBRUARY 26, 2026

Accelerating its commitment to safety, capability building and workforce development, TP Southern Odisha Distribution Limited (TPSODL) inaugurated a state-of-the-art Hands-On Technical Training Centre (HoTT) at Jeypore in Koraput district. The facility was formally inaugurated by TPSODL CEO Amit Kumar Garg.

The HoTT Centre, established under the aegis of the TPSODL Safety and Skill Development Institute (SSDI), marks a major milestone in the company's "Mission Zero Harm" initiative. It underscores TPSODL's focused strategy to create a highly skilled, safety-conscious and future-ready workforce across its operational footprint.

Designed for employees and Business Associates, the centre delivers a structured blend of classroom instruction and practical exposure. Its training framework prioritizes real-time simulation of field conditions alongside intensive hands-on technical practice.

At the heart of the facility is a modern practice yard featuring replicas of Low Tension (LT) and High Tension (HT) systems. This simulated infrastructure enables linemen and technical personnel to gain direct experience in equipment handling and operational execution within a safe and controlled setting prior to field deployment.

The centre offers comprehensive training modules covering RMU operations, auto-recloser handling, sectionalizer operations, distribution transformer maintenance, proper earthing techniques and insulation resistance testing. It also houses a dedicated SSDI classroom, a fully equipped conference hall, an Electrical Equipment Demonstration Gallery and a well-developed practice yard that supports immersive technical learning. All essential amenities have been incorporated to ensure a professional and efficient training environment.

Safety awareness has been deeply embedded across the campus through impactful wall art, visual communication boards and instructional displays, reinforcing safe work practices and strengthening accountability at every level.

Addressing the gathering, CEO Amit Kumar Garg said, "Safety and skill excellence remain central to our operations at TPSODL. The Jeypore HoTT Centre represents a strategic investment in our workforce. Structured practical exposure in a simulated environment enhances technical capability and strengthens our zero-harm commitment. Our objective is clear — build confident, competent teams that deliver reliable power with the highest safety standards."

With the commissioning of the Jeypore facility, TPSODL now operates 16 SSDI centres and three advanced HoTT centres across its licensed area. The earlier HoTT centres at Berhampur and Phulbani have strengthened workforce capability in their respective regions, while the addition of Jeypore further expands the company's robust training ecosystem.

Through sustained investment in safety infrastructure and human capital development, TPSODL continues to set higher benchmarks in the power distribution sector and remains committed to delivering reliable, efficient and safe power supply across Southern Odisha. The inauguration was attended by senior officials and colleagues.

## **TPSODL Lineman Assaulted ; FIR Registered**

**Berhampur** – A Lineman of TP Southern Odisha Distribution Limited (TPSODL), Mr. Jukta Keshari Behera, was assaulted while performing official duty on 26 February 2026 at Tikiripada village of Rayagada district. TPSODL has strongly condemned the incident and termed the act unacceptable.

According to sources, at around 12 PM, Mr. Behera, along with a team from the Electrical Section Office, Kashipur, Chandragiri, visited the village to collect outstanding electricity dues as part of routine revenue recovery activities. During the course of the drive, one individual reportedly confronted the team and physically attacked Mr. Behera.

The assault resulted in injuries to the employee, including bleeding from his nose, mouth, and left eye. Other staff members present at the scene immediately intervened, rescued him, and ensured he received medical attention.

Following the incident, TPSODL officials lodged a written complaint at Kashipur Police Station. An FIR (No. 0050) has been registered under relevant sections of the Bharatiya Nyaya Sanhita (BNS), 2023, and police have initiated an investigation. An Investigating Officer has been assigned to the case.

Locals strongly condemned the attack, stating that violence against employees discharging lawful duties is unacceptable. The company has demanded strict and exemplary action against the accused to ensure the safety and security of field staff.
